

Ideation Phase
Literature Survey On The Selected Project & Information Gathering

Date	03 October 2022
Team ID	PNT2022TMID04914
Project Name	NEWS TRACKER APPLICATION
Maximum Marks	4 Marks

Introduction:

According to our recent research we found out that there are various news web applications that are restricted for single language and also they all provide news from a single source. Examples are BBC, CNN or other local news channels like AajTak, TV9 Telugu etc. provide news in their regional languages or by default English language. These articles cannot be read by users of other countries. As per InternetWorldStats fig 1, there is a huge ratio of people accessing the internet in other languages which increases the need for content to be available in different languages.

Literature Review:

Paper Name	Publisher by	Publishing Year	Advantages	Disadvantages
Distributed platform for archiving and retrieving Online News	Chmielewski,David and Gongzhu Hu	2005		Platforms for fetching news are limited
Challenges and Issues on Online	Weal M.S.Youfoodz	2011	Upcoming challenges in Project are	Solution for those challenges is not given
